 Manufacturer of MS Circle, Seller of MS Scrap & Trader of Flanges

**BAHUBALI
STEEL**

About Us

At Bahubali Steel, we don't just manufacture steel; we build the foundation for your success. With a rich legacy spanning over 20 years in the industry, our journey has been defined by unwavering quality and a deep-rooted expertise in the steel trade.

Based in the industrial hub of Sihor, we have evolved from a specialized manufacturing unit into a trusted partner for the fabrication and utensil industries across the region. Our two decades of experience allow us to combine traditional craftsmanship with modern precision, ensuring that every MS Circle, Flange, or piece of Scrap we provide meets the highest industrial standards.

Why Choose Bahubali Steel

- Precision-engineered products tailored to exact specifications
- Premium raw materials and controlled manufacturing practices
- Capacity to support large-scale and recurring requirements
- Commitment to timely delivery and supply reliability
- Transparent dealings and long-term partnership approach

Choosing Bahubali Steel means aligning with a partner that values **quality, consistency, and trust**—delivering steel solutions that strengthen your business with confidence.

Our Products

1. MS Circles

Precision in Every Curve. We specialize in manufacturing High-Quality Mild Steel Circles in any size or diameter you require. Perfect for the utensil industry and specialized fabrication projects.

2. MS Squares (New!)

Custom Built for Structural Excellence. Expanding our manufacturing range, we now offer MS Squares tailored to your specific dimensions. Whether for industrial framework or architectural needs, we deliver squares with perfect edges and consistent thickness.

3. Industrial Flanges

The Connection of Strength. We trade in high-grade Industrial Flanges that ensure leak-proof seals and structural integrity for piping and heavy machinery applications.

4. MS Scrap Sustainable Supply

As a trusted Seller of MS Scrap, we provide reliable raw material options for industrial recycling and melting, ensuring a steady supply chain for your business
